## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on papers filed through 9/16/2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: \_\_\_\_\_.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Guest 4,309,870, that teaches that invention as disclosed and as claimed: An apparatus for minimizing coking in bearings of a turbine comprising: a lubricant reservoir 26, first and second lubricant lines 22, 32 from tank to bearings ("various stations"), a gas-turbine operated main pump 20 on line 22, an auxiliary electrical pump 30 on line 32, control means for activating the auxiliary pump when the turbine is off (col. 3, ll. 35-37), temperature sensors 54, 56 on the return lines of the pumps, a one way valve 24 on the first line, and a one way valve on the second line (un-numbered). This rejection is a 35USC102(b)/35USC103(a) rejection because Guest is silent regarding the type of the un-numbered valve on l. 32, although Guest uses the same symbol as the symbol used by Applicant for his one-way valves 30, 40, 56, 66. However, even if Guest is silent about said valve type, it would have

been obvious to one of ordinary skill in the art at the time of the claimed invention to make said un-numbered valve a one-way in order to prevent flow of oil from pump 20 into pump 30, because the purpose of the system was to lubricate the bearings of the gas turbine, and not to pump oil through inactive pump 30. Also note, that the placement of the temperature sensors 54,56 on the return line would have been an obvious placement of said sensors, because it was on the return lines that the temperature of the oil was maximal, and it was therefore in said location that the danger for oil coking and the need to prevent it that was maximal.

***Response to Arguments***

4. Applicant's arguments filed 9/23/2003 have been fully considered but they are not persuasive, for reasons fully discussed in the above rejection.
5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
